

MUFU TOKEN

Complete Tokenomics

Mufutuli Clean Water & Solar Power Project — Chirundu, Zambia

Water. Air. Light. Three elements. One mission.

1. Token Details

Parameter	Value
Token Name	MUFU
Token Symbol	MUFU
Blockchain	BNB Smart Chain (BEP-20)
Chain ID	56 (Mainnet)
Contract Address	0xAACDd8EA3F1893d01f9DA413C0a593fb39B970B9
Total Supply	150,000,000 MUFU (fixed forever)
Decimals	18
Max Wallet	No Limit (150,000,000 MUFU)
Transaction Tax	None (0% buy and sell)
Minting	No minting function — supply cannot increase
Burning	No burn function — supply cannot decrease
Compiler	Solidity 0.8.19
Verification	BscScan and Sourcify (Exact Match)
Deployment Date	March 15, 2026
Block Number	86785651
License	MIT

2. Token Allocation & Wallet Addresses

Wallet	Address	Allocation	Tokens	Governance
Liquidity Pool	0xf43e...d8Ef	55%	82,500,000	LP locked 24 months
Project	0xf1C0...c2fA	25%	37,500,000	Multi-sig 2/3
Reserve & Future	0x7833...caa5	10%	15,000,000	Multi-sig 2/3
Community	0xF4Ec...11eF	5%	7,500,000	Multi-sig 2/3

Wallet	Address	Allocation	Tokens	Governance
Team	0x9cB7...7513	5%	7,500,000	Multi-sig 2/3

Full Wallet Addresses

Liquidity Pool: 0xf43e25b3399A5F19e820749c324AD574Fd82d8Ef

Project Wallet: 0xf1c0Fb17Ef3Aee17137ead0db00D785F8B4fc2fA (multi-sig 2/3)

Reserve & Future: 0x7833d7761202F5f3b1282EA91FC9d01B15e3caa5 (multi-sig 2/3)

Community & Marketing: 0xF4Ec641A995669960E51EF9AF0CE790F1DDF11eF (multi-sig 2/3)

Team & Operations: 0x9cB7f99d59ae0D8086E492B3687Ed312212D7513 (multi-sig 2/3)

3. Lock & Vesting Schedule

Wallet	Mechanism	Duration	Details
Liquidity Pool	Time-lock (at launch)	24 months	LP tokens locked after PancakeSwap pool creation
Project	Milestone-based	Ongoing	6 tranches tied to verified project milestones
Community	Multi-sig operational	Unlocked	2 of 3 signatures required for any movement
Reserve	Time-lock	6 months	Locked for 6 months from deployment
Team	Linear vesting	12 months	Linear unlock over 12 months from deployment

4. Project Wallet Milestones

30,000,000 of the 37,500,000 MUFU in the Project Wallet is released in six tranches tied to verifiable project milestones. Milestones are denominated in USD — if the token appreciates, fewer tokens are sold per milestone. Each release requires 2 of 3 multi-sig approval.

#	Milestone	Cost (USD)	MUFU Tranche	Verification
1	Project Launch & Design	\$18,000	1,900,000	Website, design docs, site survey video
2	GENAQ Order Placed	\$84,000	8,800,000	Purchase order, GENAQ confirmation, video
3	Solar Equipment Procured	\$128,000	13,400,000	Supplier invoices, equipment photos
4	Shipping & Customs	\$15,000	1,600,000	Shipping documents, tracking, arrival video
5	Installation & Commissioning	\$10,000	1,000,000	Installation video, first water produced
6	Contingency Reserve	\$32,000	3,300,000	Released only as needed with documentation
	TOTAL	\$287,000	30,000,000	

Remaining 7,500,000 MUFU in the Project Wallet is preserved for future projects if the token appreciates sufficiently to fund milestones with fewer tokens.

5. Trust & Transparency Mechanisms

Multi-Signature Governance

All operational wallets (Project, Community, Reserve, Team) require 2 of 3 signatures via Safe (formerly Gnosis Safe) on BNB Chain. No single individual can move tokens unilaterally.

Liquidity Lock

LP tokens will be locked for 24 months immediately after PancakeSwap pool creation on launch day. Lock proof (transaction hash and locker contract link) will be published on the website and all social channels at launch.

Contract Ownership

Ownership permanently renounced on April 1, 2026 (block 90025148).

Tx: 0xb8d689646a084a34e5566330632947bb0eedae490a262a25ad5256573fc45934

Owner: 0x00

Owner Functions (Permanently Disabled)

setExemptFromMaxWallet(address, bool) — Add or remove wallet from max wallet exemption list.

setMaxWalletAmount(uint256) — Update max wallet limit. Cannot be set below 0.5% of supply (750,000 MUFU).

renounceOwnership() — Permanently and irreversibly removes the owner. No owner functions can ever execute again.

Smart Contract Verification

The MUFU smart contract is independently verified on two platforms:

BscScan — The source code has been verified and published on BscScan, the primary block explorer for BNB Smart Chain. Anyone can read the full Solidity source code and confirm: no mint function, no burn function, no transaction tax, and a fixed supply of 150,000,000 MUFU.

Sourcify — The contract has also been verified on Sourcify (Exact Match), a decentralised, open-source verification service. Sourcify confirms that both the runtime bytecode and creation bytecode match the published source code byte-for-byte.

Verify for yourself:

BscScan: bscscan.com/address/0xAACDd8EA3F1893d01f9DA413C0a593fb39B970B9#code

Sourcify: repo.sourcify.dev/56/0xAACDd8EA3F1893d01f9DA413C0a593fb39B970B9

On-Chain Transparency

All wallet addresses published. Every transaction visible on BscScan. Community can verify all token movements at any time.

6. Three-Channel Funding Model

1. Token Community

As the community grows, project wallet tokens are sold in milestone-based tranches via PancakeSwap to fund equipment and deployment.

2. Crypto Donations

Direct donations in BNB, USDT, USDC, or MUFU to the Project Wallet:

0xf1C0Fb17Ef3Aee17137ead0db00D785F8B4fc2fA (multi-sig 2/3, BNB Smart Chain)

3. Fiat Donations

Tax-deductible donations via Mufutuli Inc., a registered US 501(c)(3) nonprofit (EIN: 45-3053335). Donate at mufutuli.com/donate/

Note: MUFU Token is an independent community-driven token. It is not issued, managed, or controlled by Mufutuli Inc. The fiat donation channel is presented as a separate option and is not part of the token structure.

7. Supply Mechanics Summary

No Minting: The 150,000,000 MUFU created at deployment are the only tokens that will ever exist.

No Burns: Tokens cannot be destroyed. The supply remains constant forever.

No Transaction Tax: Zero fees on buy or sell. Clean BEP-20 standard.

No Limit (150,000,000 MUFU). Ownership renounced · this setting is permanent.

Launch: March 31, 2026 at 16:11 UTC
